

Noventus provides the following DMOSS services:

Systems & Software Engineering

- Engineering
- Systems Architecture / Integration
- System Security
- Safety Management
- Software Engineering
- Technical Certification
- Testing & Evaluation including Verification & Validation

Acquisition & Sustainment Logistics

- Integrated Logistics Support Management
- Transition Management
- Reliability, Availability & Maintainability
- Logistics Support Analysis
- Training Needs Analysis
- Configuration Management

Electronics Engineering

- Radar (HF)
- Radar (Microwave)
- Satellite Engineering
- Electro-Magnetic Interference/Electro-Magnetic Compatibility

Business Support Management

- Business Support
- Procurement & Contract Management
- Commercial Management
- Strategic Business Advice
- Facilitation Services

Weapons Engineering

- Guided Weapons Engineering
- Non-Guided Explosive Ordnance Engineering
- Explosive Ordnance / Weapons Integration Engineering

Communications Engineering

- Communications Network Engineering
- Communications Engineering (RF/Tactical)

Project Management

- Project Management Support
- Data Management
- Risk Management
- Measurement
- Process Definition & Improvement
- Schedule Management & Work Breakdown Structure
- Life Cycle Costing
- Cost Estimation & Validation
- Earned Value Management
- Software Estimation

Information & Communication Technology

- Technical Architecture Services
- System Design Services
- Business Analysis Services
- IT Infrastructure Support Services
- Information Systems Problem Management Services
- IT Configuration Management Services
- Release Management Services
- Systems Development & Implementation Services
- Information System Technical Accreditation Services
- IS Verification & Validation Services
- New System Software & Support Services

Platform Engineering

- Submarine Systems
- Maritime Systems
- Sonar
- Mechanical
- Sensor Management
- Electronic Warfare Self Protection – Airborne
- Avionic Systems
- Aerospace Systems
