

Defence Materiel Organisation Support Services (DMOSS)

- Communications Network Engineering
- Communications Engineering (RF/Tactical)
- Systems Architecture/Integration
- Software Engineering
- Integrated Logistics Support Management
- Mechanical
- Safety Management
- Testing and Evaluation including V&V
- Transition Management
- Reliability, Availability and Maintainability
- Logistics Support Analysis
- Training Needs Analysis
- Process Definition and Improvement
- Schedule Management & WBS
- Sensor Management
- Satellite Engineering
- Electro-Magnetic Interference/Electro-Magnetic Compatibility
- Configuration Management
- Engineering
- Technical Certification
- Publications Authoring and Technical Writing
- Capability Development Documentation (OCD, FPS and TCD)
- Project Management
- Data Management
- Risk Management
- Measurement
- Life Cycle Costing
- Cost Estimation and Validation
- Earned Value Management
- Software Estimation
- System Security
- Business Support
- Procurement and Contract Management
- Commercial Management
- Strategic Business Advice
- Facilitation Services
- Technical Architecture Services
- System Design Services
- Business Analysis Services
- Information technology (IT) Infrastructure Support Services
- Information Systems (IS) Problem Management Services
- IT Configuration Management Services
- Release Management Services
- Systems Development and Implementation Services
- IS Technical Accreditation Services
- IS Verification and Validation Services
- New System Software & Support Services
- Maritime Systems

- Sonar
- Submarine Systems
- Radar (HF)
- Radar (Microwave)
- EW Self Protection – Airborne
- Avionics Systems
- Aerospace Systems

Rapid Prototyping Development & Evaluation (RPDE)

- Research & Development – e.g. Test Automation Analysis of Safety and Mission Critical Distributed Systems
- Military Systems And Materials / Platform Integration
- Communications / Electronics / Networking
- Human Factors Engineering / Operations Research / Organisational Analysis
- Software Development / Integration

Defence Support Group (DSG) – Electro / Mechanical CAD Design Services

- Mechanical Computer Aided Drafting
- Electro-Mechanical Computer Aided Drafting

SEA 1000 Future Submarine Defence & Industry IPT

- Mechanical Engineering
- Electrical Engineering
- Naval Architecture
- Systems Engineering
- Hydrodynamics Engineering
- Propulsion Engineering
- Structural Engineering
- CAD Designers
- Design Tool Engineer
- Signature Management
- Weight Management
- Combat System Sensors
- Combat System Integration
- Boat Production
- Facilities Production
- Safety Management
- Verification and Validation
- Configuration and Data Management
- Cost Estimation and Validation
- Commercial Management
- Logistics
- Risk Management
